ABSTRACT

The high rate of HIV/AIDS infections is a serious issue that threatens the nation in South Africa as a whole. The purpose of this study highlights problems which are caused by HIV/AIDS infections and to determine the actions that can be taken to reduce infections by HIV/AIDS. The researcher will use qualitative method to research and obtain information. Literature review will be conducted to get perspectives of authors in relations to the presentation of HIV/AIDS infections in Tshivenda Drama’s.

The researcher will make use of literature from different scholars on the topic as a guideline in formulating a challenging and effective literature review on the topic.

The targeted groups for study are authors of Tshivenda drama’s, Black South Africans Secondary students which falls under Mutale clusters. Questionares, interviews guides and group discussion on HIV/AIDS will be conducted as a means of gathering information from targeted group.
